

Parenting Made Easier

Delivered to: Parents/caregivers of young people

Program aims

Parenting Made Easier is an educational program aimed at early intervention to provide early support for families when preparing their child towards youth. It is based on the principles of developing respect, responsibility and cooperation.

How the program is delivered

Group workshops are multi-session programs designed to give parents a complete foundation of communication and relationship-building skills that are easy to learn and apply to help them meet the everyday challenges of raising children and teens. Training is ideal for groups/schools/organisations who want to sponsor and promote parent education programs.

Workshops require a minimum of 8 participants with parent guidebooks included.
